Led umbrella light

Instruction

How to use led umbrella light

- (1) Carefully take the product from the package. Insert batteries to the battery case, Batteries not included.
- (2) Carefully unclip the two sections of the light and place around your umbrella pole at the desired height. The inner clamps should hold against the umbrella pole, clip the two sections securely together. See below diagram#1, the item should be fitted onto your umbrella pole.
- (3) The lighting can be activated via the on/off switch button at the side of the unit.

After using the light continually, it may begin to fade. When this happens, it is time to change the batteries inside the umbrella light.

⚠ WARNING

Do not mix alkaline, standard (Carbon-Zinc) or rechargeable (Nickel-Cadmium) batteries.
Do not mix old and new batteries.
Exhausted batteries should be removed from the case and dispose the batteries safely.
The supply terminals are not to be short-circuited.
Only batteries of the same or equivalent type as recommended are to be used.
Batteries are to be inserted with the correct polarity.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.
